BROKE BUDDY

Your AI-powered financial survival guide for students

TEAM ALGOHOLICS ▸ ANUSHKA KARWA · DRISHTI MAKKAR · RUDRA CHAUHAN

The Student Money Crisis

73%

of students overspend every month

NO VISIBILITY

into spending patterns or trends

ZERO GUIDANCE

no personalized financial advice

IMPULSE SPENDING

no real-time warnings or limits

MENTAL STRESS

financial anxiety hurts performance

Existing Apps Don't Cut It

✕ Just a log

Traditional trackers record expenses — they don't think

✕ Zero behavior analysis

No pattern detection, no anomaly alerts

✕ No predictions

Can't tell you if you'll run out next week

✕ One-size-fits-all

Generic tips that ignore your lifestyle

Students need intelligence, not just a logbook.

Meet BrokeBuddy

An AI financial wellness coach built for broke students

TRACKS

Every rupee, auto-categorized

ANALYZES

Detects patterns & behaviors

PREDICTS

Future balance in X days

ADVISES

Personalized AI recommendations

Not just an app. Your AI money coach, always in your pocket.

Built to Actually Help You

Smart Categorization

Auto-tags every expense — food, transport, subscriptions

Financial Health Score

0–100 score updated in real-time based on habits

AI Chat Assistant

"Can I afford this?" — instant AI answers

Spending Predictions

"You may run out in 8 days" — before it's too late

Weekly Reports

Digest of what you spent, saved, and should change

Gamified Savings

Streaks, goals, and rewards to keep you motivated

How It's Built

FRONTEND

Interactive mobile app interface

BACKEND

Auth + Database + OTP Login

AI LAYER

AI insights and chat engine

DATA LAYER

Transactions + Kaggle

Historical patterns + simulation

DATA FLOW

User Action

Mobile App

Supabase DB

AI Processing

Insights

How the AI Thinks

Pattern Detection

Identifies recurring spend clusters — food, subscriptions, going out — and flags behavioral drift.

Balance Forecasting

Uses your last 30 days of data to simulate forward. Warns you days before you hit zero.

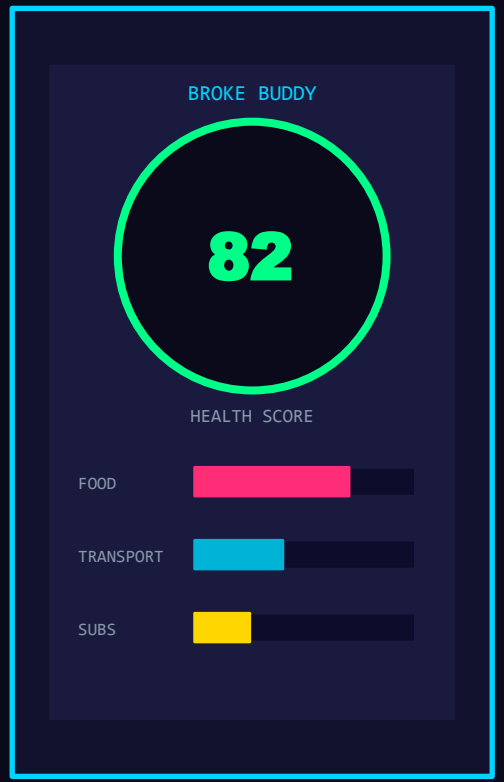
Rule + AI Hybrid

Hard rules handle edge cases. AI handles the nuance. Together they're more accurate than either alone.

Health Scoring

A composite 0–100 score weighing savings rate, spending consistency, and goal adherence.

The Cyberpunk Dashboard



Health Score Ring

Real-time 0–100 composite score, color-coded by status

Insights Panel

Weekly trends, top spend categories, smart alerts

AI Chat Interface

Conversational assistant for spending decisions

Pixel Category Icons

Visual spend breakdown — food, transport, shopping

Who We're Building For

TARGET USERS

College Students

Ages 17–25 managing limited monthly budgets

VALUE PROPOSITION

Save more money

AI catches wasteful patterns before they hurt

Reduce financial stress

Know your status — stop guessing, start deciding

Build financial awareness

Learn your habits. Improve them over time

Real Results, Real Impact

25–30%

Reduction in
unnecessary spending

₹2,250

Average monthly
savings potential

10×

Greater financial
awareness in 4 weeks

Based on behavioral finance research and pilot user projections.
Early testing on controlled spending simulations shows consistent improvement after 30 days of AI-assisted tracking.
